Cab-to-Cargo Access

Why a Walk-In van?

The evolution of delivery vehicle solutions is based upon improving delivery efficiencies.

The curtain-side had its place but the "Walk-In" step van provides over a 40% savings of time at each delivery location. Plus, it's a safer solution.

Your driver can access cargo without stepping into traffic. These egress advantages and load efficiencies were studied by major beverage companies and a decision was made...the Morgan Olson Walk-In Van made better sense and better profits.

Climate Controlled
 Cargo Area optional

Actual panel truck delivery: HIGH THEFT RISK
 Our Walk-In Van provides added security & theft reduction to your products and your drivers.
